COST COMMENTARY

REVIEW OF TENDER PRICE MOVEMENTS IN HONG KONG

According to Rider Levett Bucknall's Tender Price Index, which measures tender price movements of builder's works in the private sector in Hong Kong, there was a drop of 0.4% in tender prices in the fourth quarter of 2020. On a year-on-year basis, the tender price decreased by 3.9%.

The following are the fourth quarter year-on-year tender price movements of builder's works in the private sector in the past five years:

2015 - 2016	2016 - 2017	2017 - 2018	2018 - 2019	2019 - 2020
+0.6%	-0.8%	-4.7%	-4.1%	-3.9%

Hong Kong's economy contracted by 3.0% year-on-year in real terms in the fourth quarter of 2020, compared with the 3.6% decrease in the third quarter of 2020. On a seasonally adjusted quarter-to-quarter comparison basis, real Gross Domestic Product (GDP) increased by 0.2% in the fourth quarter of 2020 over the previous quarter. According to the Composite Consumer Price Index, overall consumer prices increased by 1.9% in January 2021 over the same month a year earlier, following a y-o-y decrease of 0.7% in December 2020. From October - December 2020 to November 2020 - January 2021, the seasonally adjusted unemployment rate rose from 6.6% to 7.0% and the underemployment rate also increased from 3.4% to 3.8%.

In the fourth quarter of 2020, Hong Kong experienced the fourth wave of local epidemic which further suppressed the recovery of economic activities. Construction output in 2020 was even lower than its past 10-year average. In particular, there was a significant drop in private construction output due to the gradual reduction in private land sale and commencement of new building works in the past few years. Shortage of land supply remains the key concern of the Government. Apart from introduction of transitional housing and exploration of new development areas, the Government also encourages better utilization of land resources including conversion and re-

development of aged industrial buildings to provide more floor area to meet the changing social and economic needs. Currently, the stock of private industrial buildings (including storage, flatted and specialized factories) is approximately 24 million square metre floor area and over 80% of these industrial buildings were constructed before 1990. The stock is 20-time more than the floor area generated from the peak annual private land sale of around 1.2 million square metre. Gradual implementation of these conversion and redevelopment schemes would provide positive support to the construction market in the near future. However, before the full effect of the Government's exercises is known, the reduction trend in construction output is expected to remain and tender prices will remain weak albeit less significantly as compared to previous quarters.

MACAU

Macau's Gross Domestic Product fell by 45.9% year-on-year in real terms in the fourth quarter of 2020. The unemployment rate for November 2020 - January 2021 stood at 2.7%, which is the same as that in October - December 2020; and the underemployment rate mildly decreased by 0.6% to 4.4%.

Macau's economy relies heavily on gambling and tourism. The significant drop in visitor arrivals during the epidemic period has adversely affected its economy. With a less optimistic economic outlook, private construction investment in Macau remains low. Macau managed to keep zero confirmed cases of COVID-19 in the fourth quarter of 2020, which could provide a strong ground for quicker economy recovery after epidemic period. In addition, the Government has planned to expedite the construction of public housing projects and increase investments in transport infrastructure, such as the Light Rapid Transit (LRT) East Line and Hengqin Port Connection and the fourth Macao-Taipa cross-harbour route, etc. While the global pandemic continues, it is expected that the tender prices in Macau will remain weak.

NOTES 注：

- The construction costs above are based on prices obtained by competitive tendering for lump sum fixed price contracts with a normal contract period and are based on normal site conditions and locations. Extra costs should be allowed for projects with fast track programme, non-traditional procurement approaches and multi-phasing completion, etc. 以上单方造价指标按竞价价格下之包干合约编制，并按正常工期、工地状况等为准。如项目采用快速施工、非传统式采购合约、分期施工等，应考虑增加额外预算成本。

The costs are average square metre unit costs only not based on any specific drawings / design. Therefore they provide nothing more than a rough guide to the probable cost of a building. Figures outside the given ranges may be encountered. When information is required on a specific project, it is essential that professional advice be sought. 平均单方造价并不是参考图纸或设计而编制。只可作为建筑造价之约算，亦可能出现范围外之单价。若有特定之工程资料，理应参考专业顾问之意见。

The standards for each type of building in selected cities in China do not necessarily follow those in Hong Kong due to local design practices and choice of materials. 中国各城市之建筑标准、采纳之物料均有所不同，并不需要与香港单价作比较。

The building costs exclude furniture, fittings and equipment (except hotel / serviced apartment / clubhouse), site formation and external works, finance and legal expenses, consultants' fees and reimbursables, value of land and fluctuations in prices between the price date as specified above and the time of calling tenders. 建筑物单价并不包括家具及设备（酒店 / 服务式住宅 / 会所除外）、工地平整、室外工程、财务、法律、顾问公司等专业费用，地价及由此单价生效日至投标时间之价格或汇率变动。

Construction floor area is the summation of covered floor areas contained within the outer surface of external wall or external perimeter, whichever is larger, measured at each floor level. It includes all floor areas occupied by stairwells, lift shafts, vertical duct wells, plant rooms, covered external floors, but excludes floor areas occupied by the atrium voids, light wells, and the areas covered by canopies and architectural features such as air conditioners (ACs) platforms, projected planters, sunshades, etc. 建筑面积乃有盖面积总和并量度至建筑物外墙外面或量度至边周界，以较大者为准；包括楼梯井、电梯井、管线井、机电间、有盖室外面积，但不包括大堂上部空间、光井及雨棚、建筑装饰如空调机平台、花槽、遮阳棚等。

Other Specific Exclusions 其它不包括项目：

HOTEL 酒店：pre-opening expenses, operating expenses, working capital, staff training and administrative costs 开幕前费用、营运费用、开办费、员工培训及行政费等。

SHOPPING CENTRE 商场：fit out to tenant areas 租户之装修工程。

INDUSTRIAL; LANDLORD 厂房（租用）：security system, air conditioning, electrical distribution in tenant areas; production and warehousing equipment; special M&E provisions 保安、空调、租户内之电器布线、生产及仓库装备，特别机电配套等。

PROJECTS IN SELECTED CITIES IN CHINA 中国主要城市：utilities to the site beyond site boundary, connection charges and capital contribution; local authority levies and taxation; import duties 工地外之主干线、接驳费、增容费、当局行政费用、税项、入口税。

Cost Model – Sports Centres

Sports centre is a purpose built building to provide a wide range of indoor leisure facilities including basketball courts, volleyball courts, badminton courts, table tennis rooms, activity rooms, fitness rooms, changing rooms and the like. It usually requires a long span multi-purpose sports hall with high headroom and column-free area for flexible conversion of sports activities to suit different international design standards. A relatively high-performance building services installation is equipped, especially the MVAC system, to maintain a desired room environment for sports activities in such a large volume space.

Our cost model for a sports centre in Hong Kong indicates that the unit cost range is from HK\$30,800 to HK\$39,500 per m² of Construction Floor Area (CFA) at 4th Quarter 2020 price level.

The variance in unit costs is mainly due to the design standards, requirements on headroom, internal space and air-conditioning criteria of different indoor facilities. Building sizes, shape, number of storeys, façade design, etc. are also factors affecting the unit costs.

	Range (HK\$/m ² CFA)
1. Foundation and substructure	3,200 ~ 4,500+
2. Structural frame and slabs	4,500 ~ 5,800+
3. External façade	3,200 ~ 5,200+
4. Architectural, builders' work and finishes (ABWF)	9,900 ~ 12,000+
5. Building services installations	10,000 ~ 12,000+
Total	30,800 ~ 39,500+

Remarks:

The cost model should be regarded as guidelines to indicate the likely range of sports centre costs for early stage cost planning. Actual costs will depend, among others, on the final design, the eventual selection of materials. The above unit cost **excludes** site development costs, basement construction (if any), indoor pools, outdoor recreational facilities, external works and landscaping, loose furniture, consultancy fees and resident site staff costs, legal and financial expenses, etc.
